

Purpose

The workshop will provide comprehensive information and instruction to industry and federal facilities that file EPA Toxics Release Inventory (TRI) Form R or A reports under Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA).

This reporting responsibility requires companies and government facilities to report annually for over 650 EPCRA Section 313 chemicals and chemical categories. Facilities must estimate and report the amounts of chemicals that enter an environmental medium or are otherwise managed as waste, even if the releases or other waste management quantities associated with these chemicals are zero.

Learn the New Lead and Lead Compounds Regulation effective Reporting Year 2001

- Reporting thresholds lowered to 100 lbs
- New qualifiers and fewer exemptions

What Industries are Regulated?

A facility is required to file Form R reports if it meets all three of the following criteria:

The facility has 10 or more full-time employees (or the equivalent of 20,000 hours per year).

The facility manufactured, imported, processed or otherwise used any of the 650 toxic chemicals and chemical compounds on the EPCRA Section 313 list in amounts greater than the threshold quantities. Threshold quantities vary from 10 lbs to 25,000 lbs depending on the chemical and the application. Listed chemicals include most of the commonly used solvents, acids, metals, metal compounds and other toxics.

The facility is in one or more of the covered SIC Codes which include **Manufacturing Facilities** (SIC Codes 2000-3999), **Federal Facilities**, **Petroleum Bulk Storage Facilities** (SIC Code 5171), **Chemical Distributors** (SIC Code 5169), **Solvent Recovery Facilities** (SIC Code 7389), **Subtitle C TSD Facilities** (SIC Code 4953), **Metal Mines** (SIC Code 10 Except 1011, 1081 & 1094), **Coal Mines** (SIC Code 12 Except 1241), and **Electricity Generating Facilities** (SIC Codes 4911 & 4939).

Workshop Registration

To register, complete the registration form. Then, mail or fax the completed form to EPA Region 3 at the address below. There is no charge for the workshop.

US EPA, Region 3
Attn: MILDRED SCHWARTZ (3WC33)
1650 ARCH STREET
PHILADELPHIA, PA 19103-2029

FAX# 215.814.3114

Please Note

Space is limited. Please register in advance for the workshop. You may make changes, cancel, or receive additional information by calling **Mildred Schwartz at 215.814.2078** or **Bill Reilly at 215.814.2072**.

Registration Form

Name: _____

Company: _____

Address: _____

City/ST/Zip: _____

Telephone: _____

NOTE: To be registered, complete the form and mail or fax to the address given under “**Workshop Registration.**” **ONE registrant per form.** Please photocopy the form to register more personnel. Registration is on a first come, first registered basis.

**Toxics Release Inventory (TRI)
Lead & Lead Compounds Rule
Effective 2001**

**Free EPA Workshop
For Industry
November 27, 2001
Philadelphia, PA**

Do you use lead or any lead
compounds at your facility?

If so, turn the page and find out more
about how this new rule may impact
your facility.

Workshop Description

The workshop will provide participants with a detailed explanation of the process to comply with TRI reporting.

The workshop will consist of lectures and interactive discussions, with practical exercises and examples to illustrate course concepts. Specific topics that will be discussed include:

TRI Reporting Requirements
Exemptions
Threshold and Release
Calculations
Accurately Completing the Form R
**Reporting Lead & Lead
Compounds**

Workshop Date

Tuesday, November 27, 2001

Registration begins at 8:00 am

Workshop is scheduled from
8:30 am - 4:00 pm

Workshop Location

Crown Cork & Seal Company, Inc.
12345 Roosevelt Blvd.
Conference Center, 1st Floor
Philadelphia, PA 19154

There is parking at Crown Cork & Seal. This facility is the World Wide Headquarters of Crown Cork & Seal. It is located in NE Philadelphia on the east side of the Roosevelt Blvd. (Rt. 1) just north of Woodhaven Rd. (Rt. 63) and about 2.5 miles south of the Pennsylvania Turnpike (Rt. 276).

Why Attend

The workshop will assist your facility to comply with your reporting obligations and avoid costly, needless penalties.

If you are unable to attend, additional free workshops will be offered in Spring 2002. Check the Region 3 web site **www.epa.gov/region3** under “**What’s New**” or **www.epa.gov/reg3wcmd** under “**Toxic Substances**” or contact Mildred Schwartz or Bill Reilly at the EPA Region 3 office for more information.
